Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 1 and 10 rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,738,163. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of the application is conceptually obvious variation of the claim 1 of the patent 6,738,163 such as “transmitting data from the sender to the recipient”, the limitation of “inserting at the location on the sender into a data transmission including an image format portion data identifying the address of the intended recipient of the image-format portion of the transmission and message tracking data” while claim 1 line 21-22 discloses the insertion of the address of the recipient on the facsimile-format data. Also the “message tracking data” is covered by the patent claim 1 lines 8-10 where the “identifying data is the routing information which is equal to tracking of information”

Art Unit: 2625

Limitation of “transmitting the data transmission over a transmission system from the sender’s location to an intermediate point of presence facility” is disclosed on the claim 1 of the said patent, lines 15-17. The limitation of “receiving the data transmission by the point of presence facility and re-transmitting the data comprising the image portion to the identified address of the recipient” is disclosed by the claim 1 of the patent on lines 18 and lines 23-24.
